LAINHEY EDMONDS

Outdoor Power Equipment Technician

I always knew I liked working with vehicles, but I had no idea where to start or what opportunities were out there. My CAREERS Program Coordinator helped me explore different options which led to an apprenticeship with Recreational Power Sports as an Outdoor Power Equipment Technician.

I am so thankful CAREERS pointed me in this direction. Who knew I would find so much enjoyment and satisfaction in taking apart snowmobiles and boats. This feels like a career path I really want to follow.

I am also lucky to work for such an amazing company. Having supportive mentors has helped me take my skills to the next level and realize my potential. My fingers are crossed I get to stay here while completing my journeyman certification.

This experience has changed my life and I'm so excited. Without the Registered Apprenticeship Program, I don't know what I would be doing. Instead, I've got my foot in the door for a career that I love.
