

Patzer Brothers

Electrical & Industrial Mechanic Apprentices

My name is Kory Patzer, I'm the oldest of three brothers who have fast tracked our training and discovered rewarding career paths in the skilled trades.

I started the Dual Credit Electrical Program while attending Westwood Community High School in Fort McMurray. After graduation, I continued my training through the CAREERS CO-OP program. My brother Aiden followed in my footsteps, while my other brother Levi gained experience as an Industrial Mechanic (Millwright) through the Registered Apprenticeship Program.

These programs were the right choice for me and my brothers because they allowed us to explore our futures, go to school and make money all at the same time.

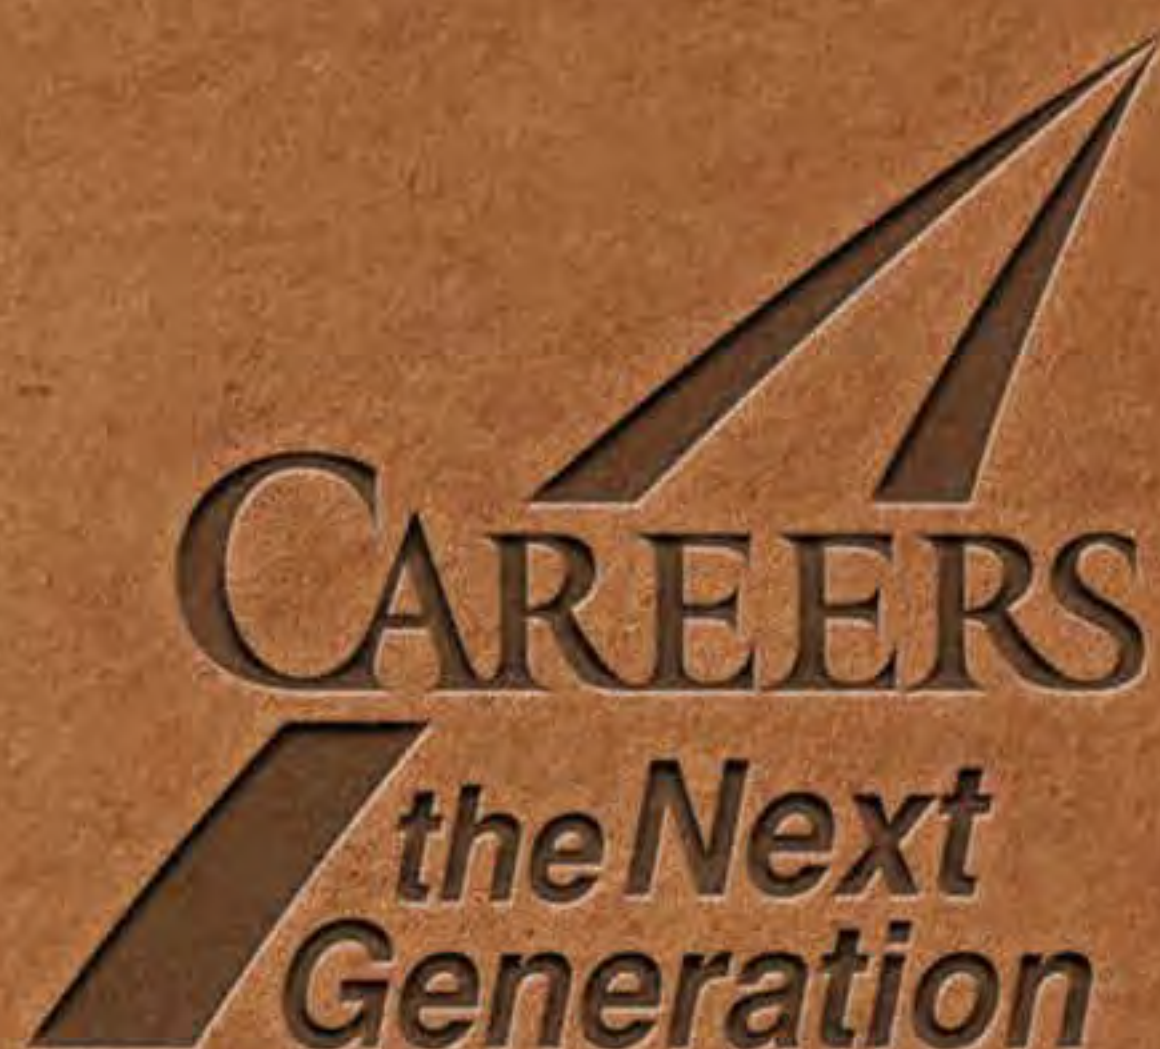

All three of us agree the most important part of our journey was the outstanding employers and mentors we had along the way. I hope one day I can pay it forward and provide that same guidance to the next generation of students.
