

ASHLEY CARVER

ANIMAL HEALTH INTERN

"Agriculture is always going to be around, but it is always changing. Providing youth opportunities to work hard and to be able to see the results of our work - it builds character. I think employers should be open to bringing people in and teaching them things. If we don't pass on that knowledge, how will the future learn?"

"My animal health internship has pushed me in a new direction and helped me understand what I want to do. I got to explore my options which was what I needed. I have gained a lot of independence and learned about what I want in life.

I am thankful to my school and CAREERS and those who helped me this summer. I would tell other students thinking about doing an internship – go for it. You will never walk away without learning something from it. Come in with an open mind and be ready to do whatever you can."
