

ASHLEY MORRELL

HET INTERN

Ashley moved to Fort McMurray and began attending Father Patrick Mercredi for the purpose of pursuing RAP. She earned a RAP placement in Instrumentation in 19/20. Unfortunately the placement was cut short by covid restrictions on the worksite.

This didn't stop Ashley! She continued to research and decided to change her career focus to heavy equipment technician. Since then, she was placed at Diversified and has excelled by showing initiative, interest and tremendous work ethic. She graduated high school in June 2021, and was selected to continue the HET apprenticeship through the CAREERS CO-OP Apprenticeship Program. She was placed at Syncrude in the fall of 2021. Ashley is planning to attend technical school complete the Period 1 Technical Training and continue her skill development. Given her experience in both programs, she has become quite the mentor for new RAP students entering the trades. Her journey wasn't easy but with perseverance she is reaching her goals.
