

# MAGGIE AND QUINN FRASER

## ANIMAL HEALTH INTERNS

*"It is a really good learning opportunity, gives you something to do, and is a really nice thing to have on your resume. It's also just a really fun opportunity for high school students."*

*"Having this animal health internship has been really, really good and very informative. We have been riding most of our lives, but we have never done polo before, so it was really good to see a different perspective. For this job we tack horses and get all the horses ready for the riders, and we get to do ranch work like gardening and other stuff. Working with CAREERS has been really good and everyone has been super helpful and it has been an easy process." - Maggie Fraser*
