

LOGAN PRIDGE

HEAVY DUTY TECHNICIAN INTERN

"Honestly, I took the Registered Apprenticeship Program to get a few extra credits, so I would be able to graduate, and it gave me so much more than that and set me up for the future. Now, I have a career that I can take with me for the rest of my life."

"My goal going forward, especially with opening my eyes to the apprenticeship, is I want to get my ticket now. Being an apprentice in the trade, and not even being a full journeyman yet, I have received more job offers than ever just from having my apprenticeship. It has opened so many doors, I don't even know where it could take me. I went in blind and now I am teaching new guys who come into the shop."

If you are interested in taking RAP, then go ask somebody. If you know nothing, that's ok, be open to everything. I am so grateful that I took this program."
