

# ABBY CULBERT

## SKILLED TRADES INTERN

*"I had no idea that I'd love it, and I do love it. I think it's really cool because you don't always see women into this stuff."*

*"I'd never really been into welding before but recently some of my teachers told me about this program that was happening. I think a lot of girls wouldn't necessarily know that this is something that they have an interest in. So by offering this program, it gives women an opportunity to see that this is actually something that they want to consider. It encourages girls to try it out."*
